

BLOCKCHAIN IN AUSTRIA

SNAPSHOT OF THE SITUATION TODAY

23 November 2018

free admission, RSVP:
www.svlaw.at/register

Oesterreichische Kontrollbank AG

Strauchgasse 3, 1010 Vienna (Reitersaal)

Come and see how Blockchain fares today

The term Blockchain has become a buzzword in board rooms in the recent past. Implications of the new technology are being discussed in a multitude of industries. Potential future applications seem revolutionary, to say the least. Immutable data storage, imperturbable rights management and a reliable supply chain tracking seem to be around the corner. Even the overthrow of the whole banking system is casually mentioned as self-evident.

We would like to invite you to take a break from predicting the future. Lets see where Blockchain in Austria stands today. What are the hard facts? How does the industry fare? What applications are implemented? And what is the legal situation today?

We are looking forward to having an exciting discussion with you.
